

SH 99 Grand Parkway Update

Good morning,

The Grand Parkway Infrastructure team continues to make great progress on the construction of segments H & I of the Grand Parkway. A number of critical activities have taken place over the past few months on FM 1485, IH 69, FM 686, and IH 10, just to name a few. The focus remains on the construction of bridges, main lanes/frontage roads, and drainage. Below you will find construction updates on segments H, I-1, and I-2 of the Grand Parkway.

Segment H Update

Major activities within Segment H include:

- The two new bridges that travel over IH 69/US 59 are near completion.
- With bridge beams now set over the new FM 1485/ SH 99 intersection, the traveling public is now utilizing the intersection. This will allow the crews to continue work in the immediate area without severely impacting the traveling public. **(photo)**
- Bridge work over Loop 494 in New Caney is near completion.
- Over the next several weeks, the team will begin to set approximately 110 bridge beams over Peach Creek. **(photo)**
- The construction of the new westbound frontage road in New Caney from Almarie Drive to Church House Gully continues.
- Scott Gardner Road at FM 1485 in New Caney remains closed through mid 2021.

Segment I-1 Update

Major activities within Segment I-1 include:

- The team continues to make great progress with the retaining walls associated with the bridges that will travel over FM 1960 and CR 605.
- In Dayton, bridge beams and deck pours have taken place over CR 621 and FM 686. **(photo)**
- The team is currently work on drilling, forming, and pouring shafts associated with the new bridge that will travel over US 90.
- Concrete paving of main lanes and ramps are taking place between US 90 and SH 146 in Mont Belvieu. **(photo)**

Segment I-2 Update

Major activities within Segment I-2 include:

- In late August and mid-September, crews completed the setting of bridge beams over IH 10 main lanes and frontage roads. Over the next several weeks, there will be a reduction in travel lanes on IH 10 main lanes and frontage roads during overnight hours in order for crews to focus on the next phases to complete this bridge. **(photo)**
- A traffic switch on Business 146 (between SH 146 and Goose Lake) in Baytown has been implemented. The traveling public is encouraged to abide by the new speed limits enforced in the area.
- The new eastbound and westbound frontage roads between Business 146 south and Lee Drive in Baytown have been opened. Over the coming weeks, the traveling public will be diverted to the new frontage roads west of Lee Drive so that crews can focus on main lane construction.
- In Mont Belvieu, crews remain active on SH 146 near FM 3180 and on FM 565 near City Hall. Bridges will be built at both of these locations **(photo)**.
- Partial demolition of the Goose Lake Bridge is underway. **(photo)**.
- Since the last quarterly update, bridge beams have been set over Fisher Road, Tri Cities Beach Road, and IH 10.
- The installation of tolling infrastructure is underway.
